POTPHOS

POTASSIUM POLYPHOSPHATE

Nutrients	Percentage (%)
Phosphorus (as P_2O_5)	12%
Potassium (as K_2O)	25%
Carbon	ENRICHMENT

Dosage & Application

Recommended Dosage

- ↑ Foliar : 3 ml per litre of water
- ↑ Soil/Drip Application : 5 ml per litre of water
- ↑ Drone Spray : 300 ml Per acre

Application Timing

Apply during:

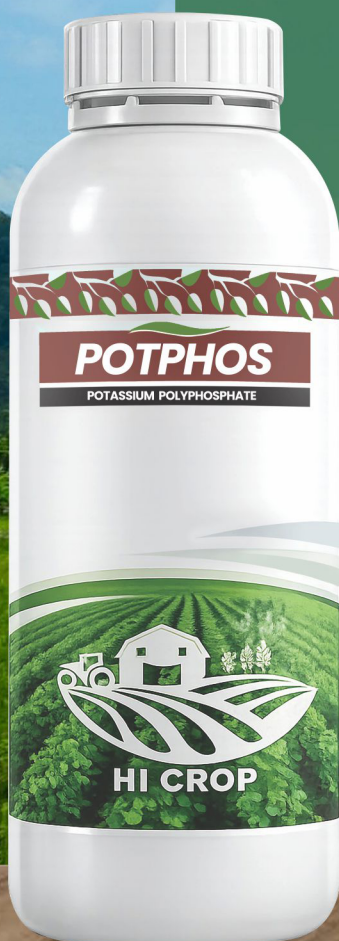

- ↑ Initial growth stage
- ↑ Tillering stage
- ↑ Flowering stage
- ↑ Fruit/seed formation stage

Application Frequency

- ↑ Apply 2–3 times during the crop cycle
- ↑ Maintain 15–25 days interval between applications

Application Guidelines

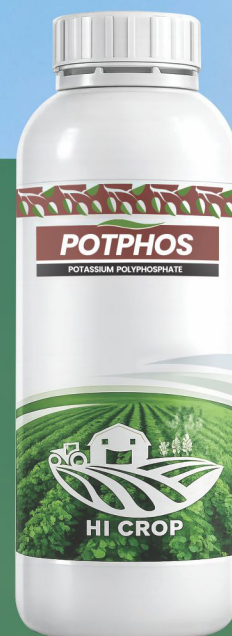

- ↑ Use during active crop growth stages
- ↑ Ensure proper dilution before application
- ↑ Suitable for foliar, drone, soil, and drip application
- ↑ Adjust dosage based on crop type and growth stage

www.dlpl.com

BENEFITS

- ↑ Promotes fast growth & better nutrient absorption
- ↑ Effective even at low dosage
- ↑ Increases yield & overall productivity
- ↑ Enhances resistance to pests & stress
- ↑ Improves crop quality in an eco-friendly way

PHYSICAL & CHEMICAL PROPERTIES

Parameter	Details
Colour	Light Translucent Creamy
Form	Smooth Liquid
pH at 20°C	10 ± 1
Density	1.10 - 1.4
Composition	Phosphorus + Potassium + Carbon Enriched Formula
